O. PROJECT FACT SHEET

I. PROJECT AND PROMOTER OVERVIEW	
Project title	Integrated Agro-Industrial Food Processing & Organic Fertilizer Manufacturing System
Pilot Agrofood Processing Site's name:	AFOOPROC-Agrofood Processing And Organic Processing Centre
GMP-Compliant Processing Facility's name	ABIPPOF (Agrofood & Bio-Inputs Processing Facility) INDUSTRIES
Promoter entity's name	African Green Farmers (A.G.F) Limited
Incorporation Date	12 March 2025 (See A.G.F Limited's Certificate of incorporation)
TPIN (Tax Pay Incorporation Number)	2003675243
Central Area of Production	ACIDS (Advanced Computational Intelligence & Decision Sciences)-enabled organic production industrial platform spanning up to over 2,000-hectare farmland
Projected contractual supplying local farmer cooperatives	
Investment License	Ref. No. ZDA/59004/10/2025 (Zambia Development Agency)
5-Year Incentives	Ref. No. ZDA/DG/DUTY, 22 nd January 2026 (Ministry of Finance)
Location of the Promoter entity	KEEMBE ward, Along Mungule Road Plot NO.20, CHIBOMBO village, LITETA chiefdom, CHIBOMBO district, Central Province Zambia
Contacts	Managing Director: HARIMENSHI Alexis WhatsApp: +260 777 844 844 Cell. +260764346468 Email: agfcompany2026@gmail.com
Contact person	
Platform	Integrated Agro-Industrial Food Processing & Organic Fertilizer Manufacturing System
II. INVESTMNT & PROFIT OVERVIEW	
Total Project Investment	USD 63.209.692,00
Type of proposed loan :	Concessional long-term project loan
Objective of the loan	Extension of AFOOPROC Pilot processing unit into BIPROF INDUSTRIES
Proposed grace period	5 years
Main Security Package	SBLC, DSRA
Proposed repayment tenor :	25 years
Proposed dicount rate	10.00%
Year 1 Net Result:	USD -21 752 471,40 : Negative (Capital deployment phase)
Year 2 Net Profit:	USD 12 713 372,31
Year 3 Net Profit:	USD 13 035 818,24
Year 4 Net Profit:	USD 14 637 734,08
Year 5 Net Profit:	USD 15 695 786,06
Year 6 Net Profit:	USD 20 647 306,06
Year 7 Net Profit:	USD 25 389 778,06
Year 8 Net Profit:	USD 31 018 268,06
Year 9 Net Profit:	USD 37 844 836,06
Year 10 Net Profit:	USD 47 682 468,06
Total net profit over 10 Yeats	USD 196 912 895,60
NPV (Net Present Value)	30,647,214.15
IRR (Internal Rate of Return)	15.78%
PI (Profitability Index)	1.48

I. TECHNICAL PLAN

1. EXECUTIVE SUMMARY

African Green Farmers Limited (A.G.F Limited) is a private-owned Zambian agro-industrial investment company establishing a fully integrated, ACIDS-Enabled circular bioeconomy enterprise focused on the development and manufacturing, domestic, regional and international commercialization of multiple **(1) GMP** (Good Manufacturing Practice) Grade **Natural & Bioactive Extracts**—Crude to High-Purity Grades, **(2) Nutraceuticals**, **(3) Food Supplements**, **(4) Clean-Label Foods and Beverages** – Including Functional & Fortified Foods and Beverages, through the AGF Limited's integrated ANINOVA INDUSTRIES facility (Advanced Natural, Integrated Nutraceutical, Organic & Value-Added Agro-Bio Industries). ANINOVA INDUSTRIES seed capital is a **USD 63 Million** Senior Secured Development Facility to establish one of Southern Africa's integrated agro-industrial manufacturing industries.

The Project combines organic agricultural production, industrial manufacturing, biological agricultural inputs, research laboratories, quality assurance systems, logistics infrastructure, and commercialization networks within a single vertically integrated operating model designed to maximize value addition, strengthen supply-chain security, and generate sustainable long-term cash flows, under security package of SBLC (Standby Letter of Credit) and DSRA (Debt Service Reserve Account).

ABINOVA INDUSTRIES' health products include fortified instant soymilk powder, fortified plant milk blend (Soja+almonds+coconuts), enriched mixed fruit juice blends, and botanical standardized extracts of ultra-premium purity (99%) from, essentially, local agricultural organic crops (Fruits, vegetables, nptanical leaves, roots, seeds/grains, nuts, etc.).

ABINOVA INDUSTRIES facility's manufacturing advanced technologies include **(1)** Precision Plant Cell/Tissue & Microbial Metabolic Engineering, Elicitation & Fermentation, Biostnthesis, Enzymatic Biotransformation and Manufacturing, **(2)** Cryogenic Liquid Nitrogen (LN2)-Assisted Cold Extraction & Lyophilization into dry cakes, **(3)** Advanced Active/dynamic Vaccum Freeze Drying System for High-Viscosity Lipid-Rich Botanical Emulsions/Extracts, **(4)** Advanced Cryogenic Liquid Nitrogen-Assisted Micronization (Reducimg botanical materials into tiny particles), **(5)**, Hybrid/Integrated-Ethanol/Ethyl Acetate Supercritical CO2 Extraction, **(6)** Integrated Multi-Stage Ultra-High Purity Bioactive Purification, **(7)** Advanced GMP Dosage-Formulation & Manufacturing, **(8)** Precision Macronutrient, Microsnutrient & Bioactive Fortification, as well as **(9)** Advanced GMP Nitrogen-Flushed & Hermetically Sealed Packaging.

The platform integrates:

- More than 2,000 hectares of integrated organic agricultural production systems
- Over 5,000 contract farmers
- Advanced manufacturing ABINOVA INDUSTRIES facility on 5-hectare land
- Advanced scientific SERIQA LABORATORIES
- ABINOVA AGRO-ESTATES
- ABINOVA LIVESTOCK BIORESOURCE systems
- NATURAL HEALTH FOOD SUPERMARKETS Network
- Domestic, regional, and international commercialization channels

The facility supports the scale-up from an existing pilot processing unit to fully integrated industrial-scale production platform.

2. EXECUTIVE CREDIT SUMMARY

A.G.F Limited, through its manufacturing division “**ABINOVA INDUSTRIES**”, presents a fully integrated agro-industrial and nutraceutical production platform comprising the initial commercial product portfolio comprising at least **initial** 11 standardized and clean-label flagship products to be manufactured in phase I through ABIPPOF INDUSTRIES and with the technical cooperation with self-owned CERIQA Laboratories.

A.G.F Limited's CERIQA LABORATORIES continuously pursues R&D on innovative product discovery, powering ABINOVA INDUSTRIE's industrial-scale manufacturing of evidence-based new organic products for domestic, regional and global commercialization.

A.G.F LIMITED'S CORPORATE STRATEGIC BUSINESS UNITS (SBUs)

The Project is designed to create a scalable industrial ecosystem capable of supporting sustainable debt repayment while delivering significant economic, social, technological, and environmental development impact.

3. COMPANY PROFILE

Legal Name: African Green Farmers (A.G.F) Limited

TPIN (Tax Pay Incorporation Number) : 2003675243

Investment License: ZDA/59004/10/2025

5-Years Tax Incentives: Ref. No. ZDA/DG/DUTY, 22nd January 2026 (Ministry of Finance)

SBLC (Standby Letter of Credit) mechanism: In readiness from Absa Bank Zimbaia

4. BACKGROUND & STRATEGIC RATIONALE

The Republic of Zambia presents one of Africa's most compelling agro-industrial investment destinations, underpinned by political stability, a strategic location at the center of Southern Africa, abundant freshwater resources, and over 42 million hectares of arable land, much of which remains available at highly competitive acquisition costs. With access to regional markets through SADC, COMESA, and AfCFTA, Zambia provides a gateway to a rapidly expanding consumer base while offering significant opportunities for agricultural commercialization, industrial value addition, and export-led growth.

A.G.F Limited is strategically positioned to capitalize on these structural advantages through a vertically integrated agro-industrial and biotechnology platform that combines large-scale regenerative agriculture, advanced manufacturing, advanced laboratory-based scientific research and quality control systems, and export commercialization. The Project transforms underutilized agricultural resources into bioactive- and nutrient-dense food, nutraceutical, and biological agricultural products, driving import dependence reduction, foreign exchange generation, sustainable employment creation, rural industrialization, and long-term sustainable economic development while delivering strong commercial returns and institutional-grade investment value.

5. VISION STATEMENT

To become a leading African agro-industrial enterprise driving sustainable food manufacturing, regenerative (Bio) agriculture, rural industrialization, and export-oriented value addition.

6. MISSION STATEMENT

To develop a scalable agro-industrial ecosystem that transforms agricultural resources into bioactive-and nutrient-dense food and agricultural products through advanced processing technologies and inclusive rural large-scale participation.

7. STRATEGIC INVESTMENT RATIONALE

7.2. Global Opportunity

Growing international demand for value-added food products, biological agricultural inputs, sustainable agriculture, and traceable supply chains continues to create significant opportunities for integrated manufacturing platforms.

7.3. African Opportunity

Rapid population growth, urbanization, industrialization, and regional market integration continue to expand demand for locally manufactured, high-quality agricultural and food products.

7.4. Zambia Strategic Advantages

- Political stability
- Investor-friendly environment
- Central regional location
- Access to SADC, COMESA, and AfCFTA markets
- Abundant agricultural resources
- Favorable climatic conditions
- Strong industrialization agenda
- Export growth potential

7.5. Competitive Advantages

- Vertical integration
- Internal feedstock security
- Contract farming ecosystem
- Scientific research infrastructure
- Advanced manufacturing systems
- Diversified product portfolio
- Controlled commercialization channels
- Export-oriented revenue streams

7.6. Value Creation Drivers

- Agricultural value addition
- Manufacturing margins
- Export growth
- Farmer integration
- Distribution control
- Innovation-driven productivity
- Scalable commercialization

7. STRATEGIC 10-YEAR OBJECTIVES (2026–2035)

To build a globally competitive African agro-industrial and biotechnology platform that integrates large-scale regenerative farming, cutting-edge manufacturing technologies, advanced laboratory-based scientific applied scientific research and development (R&D), and international market expansion; delivering more than USD 196 million in cumulative net profit (See financial projections page 17-20), over USD 100 million in annual export earnings, 50,000+ sustainable job opportunities especially for jobless youth and women, and 5,000+ contracted rural farmers, while driving sustainable industrialization, biotechnology advancement, food system resilience, foreign exchange generation, and broad-based socio-economic transformation.

8. PROJECT INVESTMENT REQUIREMENT & USE OF FUNDS

The requested financing of **USD 63,209,692** is intended to exclusively finance the establishment, commissioning, operationalization, and commercialization of A.G.F Limited's fully integrated agro-industrial manufacturing facility (**ABINOVA INDUSTRIES**), comprising industrial production facilities, advanced processing technologies, research and quality assurance laboratories (**CERIQA LABORATORIES**), commercial organic agricultural estates (**ABINOVA AGRO-ESTATES** on 2002 hectare-farmland), livestock and bio-resource systems (**ABINOVA LIVESTOCK& BIORESOURCES** for initial 150 F1 Jersey-Holstein-Fresian Dairy Heifers- 50% Jersey x 50% Holstein-Fresian and 150 swine), utilities, logistics infrastructure, digital intelligence platforms, regulatory compliance frameworks, initial market deployment., and funds are allocated as follows:

ALLOCATION OF FUNDS	AMOUNT IN USD	%
Engineering, Procurement & Construction (EPC)	1,377,745	18%
Industrial Manufacturing Infrastructure	15,170,326	24%
Industrial Processing Line Systems	13,274,035	21%
Research, Quality Assurance & Innovation Laboratories	3,792,581	6%
Agricultural Production Infrastructure	5,056,775	8%
Livestock & Bioresource Infrastructure	2,528,388	4%
Utilities, Energy & Water Systems	3,160,485	5%
Digital Traceability, Automation & ACIDS Systems	1,264,194	2%
Project Management, Regulatory Compliance & Certification	1,264,194	2%

Initial Working Capital & Commercial Launch	4,424,678	7%
Total Project Investment Cost (TPIC)	63,209,692	100%

NOTE: See the table of financial projections on page 17-20 for details.

9. PROJECT READINESS AND BANKABILITY

- ☞ Company incorporation by the Zambia Regulatory Authority (ZRA)
- ☞ Investment license secured by Zambia Development Agency (ZDA)
- ☞ Tax incentives for five next years secured from the local Ministry of Finance
- ☞ SBLC (Standby Letter of Credit) mechanism in readiness at the local commercial Bank: Absa Bank Zambia PLC
- ☞ At least 11 flagship products validated for large-scale manufacturing and commercialization
- ☞ Over 2000 hectare-farm land already identified for future commercial organic farming expansion
Roughly 100 hectares agricultural land secured
- ☞ 3 hectares intended for industrial processing secured, with expansion plans to 5ha
- ☞ Pilot Agrofood Processing Site (AFOOPROC) constructed and equipped with pilot manufacturing equipment, manufacturing activities currently in progress)
- ☞ At least 11 initial flagship products developed (See pages 9-11) and validated by AFOOPROC whose 5 are already certified by Zambia Bureau of Standards (ZBS) in readiness for large-scaling industrial manufacturing and domestic, regional and international commercialization
- ☞ Proforma invoices available for industrial construction materials, industrial equipment (full turnkey systems), laboratory equipment, packaging materials, reagents, etc.
- ☞ 625 Lady Finger banana plants established as pilot farming where our main organic fertilizer is being tested for future large-scale production and utilization
- ☞ Contract farming system (to collaborate with national-wide trained farmers) initiated S

10. FLAGSHIP PRODUCT PORTFOLIO

1. Advanced Multi-Functional Bioactive Complex

2. Immune Boosting Extract

3. Advanced Antioxidant Complex

4. Regenerator Plus

5. Fortified Soymilk Powder

6. Enriched Plant Milk Blend

7. Fortified Vacuum Dried Tofu

8. Clean-Label Mixed Juice Blend

9. Multi-Pathogen Bio-control Complex

10. Ultra-Fine Bio-fertilizer Complex

11. Bioshield Fertilizer

11. STRATEGIC INNOVATION PIPELINE

Beyond its 11 flagship products, A.G.F Limited will capitalize on the integrated capabilities of CERIQA Laboratories and ABINOVA INDUSTRIES (Our two main Corporate Strategic Business Units) to sustain a perpetual pipeline of scientifically validated, proprietary, and commercially scalable innovations.

This end-to-end laboratory-based scientific research, development, validation, and industrialization platform is engineered to continuously generate and globally deploy next-generation nutraceutical, functional food, agricultural, and bio-based technologies, ensuring that the Company's domestic, regional, and international distribution networks remain permanently supplied with differentiated, high-value, export-ready, and globally competitive products capable of sustaining long-term growth, market leadership, and innovation-driven value creation.

12. COMMERCIALIZATION, REVENUE MODEL & REPAYMENT CAPACITY

12.1. Revenue Streams

- Industrial food manufacturing
- Biological agricultural inputs

- Agricultural production
- Retail commercialization
- Institutional sales
- Regional distribution
- Export sales

12.2. Market Strategy

- Domestic Market
- Retail, wholesale, institutional, and specialized distribution channels.
- RegiSonal Market
- SADC, COMESA, and East African Community.
- International Market
- Strategic export partnerships and international distribution channels.

13. TRANSPARENCY & SECURED FUNDING STRUCTURE

- ☞ SBLC support from local financial institution (Bank) to the funding institution
- ☞ Escrow account at the receiving bank
- ☞ DSRA (Debt Service Reserve Account)
- ☞ Milestone disbursements
- ☞ Independent audits

14. DEBT REPAYMENT STRATEGY

Debt repayment shall be supported by diversified revenues generated through manufacturing, agriculture, biological inputs, distribution, and exports.

The vertically integrated business model strengthens margin retention, reduces supply risk, improves earnings visibility, and supports long-term debt servicing capacity.

Export revenues provide additional foreign-currency earnings that strengthen repayment resilience and reduce foreign-exchange exposure.

15. RISKS & MITIGATION FRAMEWORK

Risks	Mitigation Measures
Agricultural Risk	Hydraulic Ram Pump Irrigation System, regenerative (Bio) agriculture, crop diversification, Agrivision Integrated Monitoring Platform (AIMP) agronomic monitoring, Land Title Risk Mitigation Framework (LTRMF)
Feedstock Risk	Internal production, 5,000+ Contracted Farmers integrated into A.G.F Limited's agronomic supply system, long-term institutional supply agreements
Market Risk	Log-term institutional supply agreements for large-scale manufactured output, diversified markets, multiple product categories, self-owned Natural Health Food Supermarket network, export channels
Execution Risk	Phased implementation, EPC controls, independent monitoring
Technology Risk	Proven industrial systems, strategic technical partnerships, preventive maintenance
Financial Risk	SBLC (Standby Letter of Credit) issued in favour of the lender, diversified cash flows, DSRA, treasury controls

Technical risk	Recruitment of highly qualified experimented professionals
Foreign Exchange Risk	Export revenues and currency risk management
Governance Risk	Independent oversight, audits, and compliance systems

16. ROBUST DEBT SERVICING CAPACITY & FINANCIAL VIABILITY

The project exhibits robust medium- and long-term credit fundamentals, transitioning from an initial deployment-phase loss in Year 1 to strong profitability.

The table of financial projections below has been formulated with due diligence and rigor to demonstrate A.G.F Limited's strong creditworthiness and bankable capacity to fully and punctually meet all scheduled debt obligations throughout the financing period:

16.1. Quick Financial Projection Overview

Year	OPERATION COSTS	GROSS MARGIN (Sales)	NET PROFIT
1	USD 63.209.692,00	USD 32 033 690,00	USD -21 752 471,40
2	USD 18 497 960,00	USD 36 659 920,44	USD 12 713 372,31
3	USD 18 792 260,00	USD 37 414 857,48	USD 13 035 818,24
4	USD 20 780 940,00	USD 41 691 988,68	USD 14 637 734,08
5	USD 27 827 520,00	USD 50 250 071,52	USD 15 695 786,06
6	USD 38 350 720,00	USD 67 846 871,52	USD 20 647 306,06
7	USD 39 480 520,00	USD 75 751 631,52	USD 25 389 778,06
8	USD 41 347 020,00	USD 85 658 831,52	USD 31 018 268,06
9	USD 41 358 820,00	USD 95 422 871,52	USD 37 844 836,06
10	USD 42 257 060,00	USD 110 374 871,52	USD 47 682 468,06
Total/10 years	USD 351 828 612,00	USD 633 105 605,72	USD 196 912 895,60

16.2. Profitability Evaluation (DCF Method) In USD

Year	Investment USD	Operating Cash Flow	Discount Rate	Discounted Cash Flow (DCF)	Cumulative DCF
Year 0	63 135 792,00	.0,00	10.00%	-63 135 792,00	-63,135,792.00
Year 1	.0,00	-21 752 471,40	10.00%	-19,774,974.00	-82,910,766.00
Year 2	0,00	12 713 372,31	10.00%	10,507,746.54	-72,403,019.46
Year 3	0,00	13 035 818,24	10.00%	9,794,266.03	-62,608,753.43
Year 4	0,00	14 637 734,08	10.00%	9,997,437.60	-52,611,315.83
Year 5	0,00	15 695 786,06	10.00%	9,746,070.95	-42,865,244.88
Year 6	0,00	20 647 306,06	10.00%	11,655,132.66	-31,210,112.22
Year 7	0,00	25 389 778,06	10.00%	13,029,269.88	-18,180,842.34
Year 8	0,00	31 018 268,06	10.00%	14,470,583.48	-3,710,258.86
Year 9	0,00	37 844 836,06	10.00%	16,050,273.24	12,340,014.38
Year 10	0,00	47 682 468,06	10.00%	18,384,077.29	30,724,091.67
Total	63 135 792,00	196 912 895,60	10.00%	93,859,883.67	30,724,091.67

16.3. Project Financial Viability Assessment

Financial Indicator	Result	Assessment
Total Project Investment	USD 63 135 792,00	Large-scale integrated agro-industrial investment platform
Discount Rate (Cost of capital)	10.00%	Benchmark rate used to DCF valuation
NPV (Net Present Value)	30,647,214.15	Positive value creation above invested capital
IRR (Internal Rate of Return)	15.78%	Exceeds financial cost by 5.78 percentage points
PI (Profitability Index)	1.48	Every 1 USD invested generates 1.48 in present value benefits

Grace Period	5 years	Supports operational stabilization before principal repayment
Discount Payback Period	Approximately 9 years	Full capital recovery achieved during 9 years
Post-Grace Capital Recovery Period	Approximately 5 years	Capital recovery occurs about 5 years after principal after principal repayment begins
OVERALL ASSESSMENT		
Criteria	Conclusion	
Project Value Creation	Strongly Positive	
Financial Viability	Financially Viable	
Debt Servicing Capacity	Adequate	
Investment Attractiveness	High	
Long-Term Sustainability	Strong	
Financing Recommendation	Suitable for Long-Term Project Financing	

16.4. Interpretation

The Project Financial Viability Assessment above confirms that A.G.F Limited is financial robust and highly investment-attractive, delivering a positive NPV of USD 30.65 million, an IRR of 15.78% above the 10% cost of capital, and a Profitability Index of 1.48.

Despite a 5-year grace period, the project achieves full capital recovery by 9th years, demonstrating strong debt-servicing capacity, solid cash-flow resilience, and long-term financial sustainability.

17. DEBT REPAYMENT ASSURANCE & CASH FLOW SECURITY PLAN

- **Borrower:**
A.G.F Limited (“the Borrower”).
- **Facility Amount:**
USD 63,209,692 (the “Facility”).
- **Facility Type:**
Senior Long-Term Project Finance Facility secured by Standby Letter of Credit (SBLC) issued via ABSA Bank Zambia (the “Facility Agent”).
- **Grace Period:**
5 (five) years from Financial Close, covering construction, commissioning, and ramp-up.
- **Tenor:**
25 (twenty-five) years inclusive of grace period.
- **Repayment:**
Principal and interest shall be amortized post-grace period in accordance with a structured repayment schedule agreed at Financial Close.
- **Security Package:**
The Facility shall be secured by (i) SBLC issued via **ABSA Bank Zambia**, (ii) irrevocable assignment of all project revenues into a controlled escrow structure, and (iii) a fully funded Debt Service Reserve Account (DSRA).
- **DSRA Requirement:**
The Borrower shall at all times maintain a DSRA equivalent to not less than twelve (12) months of scheduled debt service obligations.
- **Disbursement Conditions:**
All drawdowns shall be made on a milestone-based basis and shall be conditional upon independent technical certification, financial verification, and prior approval of the Facility Agent.

- **Cash Flow Waterfall:**

All project revenues shall be irrevocably paid into an escrow account and applied strictly in the following order of priority: (i) taxes and statutory obligations, (ii) operating costs, (iii) debt service obligations, (iv) DSRA replenishment, and (v) permitted distributions.

- **Debt Service Mechanism:**

All principal and interest payments shall be effected exclusively through ABSA Bank Zambia acting as Facility Agent under controlled and traceable banking arrangements.

- **Fund Availability Principle:**

The Facility Agent shall ensure timely availability and release of approved funds strictly in accordance with verified milestone completion, ensuring uninterrupted execution of the Project.

- **Audit & Compliance:**

The Project shall be subject to continuous independent technical, financial, and compliance audits throughout the tenor of the Facility.

- **Monitoring & Reporting:**

The Borrower shall provide continuous reporting, covenant monitoring, and financial transparency in a form acceptable to the Facility Agent throughout the Facility term.

- **Purpose:**

This structure is designed to ensure enforceable repayment certainty, disciplined cash flow control, risk mitigation, and full capital protection for the Lender.

18. STRATEGIC DEVELOPMENT IMPACT (YEARS 1–10)

18.1. Social Impact

- 36,500–51,200 total direct, indirect and induced employment opportunities created.
- 3,000+ direct jobs and 10,000+ indirect jobs generated across manufacturing, agriculture, research, logistics and commercialization activities.
- Youth employment: approximately 55% of direct workforce (1,650+ jobs).
- Women's employment: approximately 45% of direct workforce (1,350+ jobs).
- More than 5,000 rural farmers integrated into structured value chains through approximately 200–250 registered cooperatives.
- More than 50,000 rural value-chain beneficiaries supported through agricultural production, processing and commercialization activities.

18.2. Health & Nutrition Impact

- Increased availability of nutrient-dense food products including fortified health food products) for infants, children, adolescents, adults and elderly populations.
- Improved nutritional support for pregnant women and breastfeeding mothers.
- Strengthened food security and dietary diversity through locally manufactured value-added food products.

18.3. Economic & Financial Impact

- Annual GDP contribution exceeding USD 150 Million at operational maturity.
- Export earnings exceeding USD 100 Million annually.
- Significant contribution to corporate income tax, PAYE, VAT and other statutory revenues.
- Increased foreign-exchange generation and national productive capacity.

18.4. Rural Development Impact

- Increased farmer incomes through guaranteed market access and structured offtake agreements.
- Expansion of rural entrepreneurship and agricultural productivity.
- Strengthened cooperative development and local economic activity.

18.5. Technological Impact

- Transfer of advanced agro-industrial manufacturing technologies.
- Establishment of modern research, analytical and quality assurance laboratories.
- Development of specialized industrial, scientific and technical skills.
- Deployment of advanced digital traceability, automation and ACIDS ((Advanced Computational Intelligence & Decision Sciences)-enabled operational systems.

18.6. Environmental & Ecological Impact

- Adoption of regenerative agriculture across production systems.
- Production and utilization of biofertilizers and biological crop-protection solutions.
- Circular bioeconomy utilization of agricultural and livestock by-products.
- Improved soil fertility, resource efficiency and long-term environmental sustainability.

18.7. ESG Alignment

- **Environmental:** Regenerative agriculture, circular bioeconomy and sustainable resource utilization.
- **Social:** Employment creation, youth empowerment, women's inclusion and farmer participation.
- **Governance:** Independent audits, IFRS-aligned reporting, compliance systems and institutional oversight.

II. FINANCIAL PLAN

20. PROJECT IMPLEMENTATION TIMELINE

No	PROJECT COMPONENT	CONDENSED KEY ACTIVITIES	TIMELINE
1	Financial Close & Mobilization	Financing closure, SPV establishment, governance framework setup, executive recruitment, project controls implementation, and deployment of Enterprise AI management systems.	Months 1–2
2	EPC – Core Industrial Infrastructure	Detailed engineering, EPC contractor mobilization, construction of manufacturing facilities, utilities, logistics infrastructure, warehousing, and GMP-compliant production environments.	Months 2–12
3	Agro-Production Infrastructure	Land acquisition and titling (up to 2,002 ha), site preparation, nursery establishment, Hydraulic Ram Pump Irrigation System, agro-estates development, and regenerative agriculture infrastructure deployment.	Months 2–9
4	Livestock & Bioresource Systems	Development of cattle (Initial 150) and swine (Initial 150) production units, procurement of breeding stock, installation of biosecurity and nutrition systems, and establishment of bioresource valorization infrastructure.	Months 2–10
5	Equipment Procurement & Commissioning	Procurement, installation, calibration, validation, commissioning, performance testing, technical training, and operational technology transfer.	Months 2–15
6	Supply Chain & Working Capital	Raw material sourcing, supplier qualification, packaging and consumables procurement, traceability systems implementation, and working capital deployment for production ramp-up.	Months 2–12
7	Pilot Production & Certification	Pilot manufacturing runs, process optimization, product validation, quality assurance certification, regulatory approvals, product registration, and GMP/HACCP/ISO compliance.	Months 10–15
8	Commercial Operations Rollout	Full-scale production launch, domestic commercialization, retail and wholesale distribution, healthcare channel penetration, and agro-input market expansion.	Months 15–24
9	Export Entry & Certification	Export registration, ISO certification completion, international compliance alignment, regional market entry, distribution partnerships, and export commercialization scaling.	Months 24–48
10	Expansion & Optimization	Capacity scaling, product portfolio diversification, ACIDS (Advanced Computational Intelligence & Decision Sciences)-driven operational optimization, continuous R&D, efficiency enhancement, and export growth acceleration.	Months 48–60

Total Project Duration: **60 Months** (5 Years).

21. SCREDIT COMMITTEE APPROVAL NOTE

Following review of the projected financial performance, cash flow profile, debt-servicing capacity, and strategic development merits of the project, the Credit Committee considers the proposed **USD 63,135,792,00** financing to cover pre-operational expenditures, CAPEX, and OPEX fully supportable and recommends approval in principle. The transaction demonstrates strong bankability, substantial long-term value creation potential, and a resilient repayment profile, thereby constituting a highly attractive and developmentally transformative financing opportunity.
